

Product Requirements Document (PRD)

Project: Talkin – User (Listener) App, Creator App, Admin Dashboard

1. Objective

To refine the **User/Listener app**, **Creator app**, and **Admin dashboard** based on initial testing feedback. The goal is to ensure usability, revenue tracking, and controlled creator onboarding.

2. User (Listener) App Requirements

2.1 Homepage

- **Profiles Displayed:** Clicking anywhere on a profile card should open the profile.
- **Tabs:**
 - **New** → Recently joined creators.
 - **Follow** → Followed creators.
 - **Popular** → High-performing creators.
- **Random Match:** Optional feature on Homepage.

- **Fake Calls:**
 - New users will receive **fake calls** (system generated).
 - On clicking “Receive”, redirect to **Recharge Page**.

2.2 Profile Page

- **Currency:** INR only (remove coins system).
- **Talk Now Button:** Shows price in INR.
- **Remove:** Message option.
- **Basic Details Section:**
 - Country
 - Followers

- “Follow” button (Follow = get notified when creator comes online).
- **Additional Info:**
 - About Me
 - Talks About
 - Hobbies
 - Food Preferences
 - Sports Interests
 - 3–5 Profile Pictures
- **Blocked List:**
 - Button in profile to view/unblock previously blocked creators.

2.3 Recharge & Calls

- User must have **minimum 3 minutes balance** to initiate a call.
- Balance should **deduct in INR per minute**.
- During call:
 - Option to send gifts.
 - Option to recharge balance.

2.4 Support

- Support chat **enabled only after first successful call**.

2.5 Signup & Login

- **Mandatory:** Mobile number.
 - **Optional:** Email.
 - **Fast Login:** Device ID login (no password).
-

3. Creator (Listener) App Requirements

3.1 Signup

- Details: Name, Age, City, Aadhar, PAN, Bank Details.
- **Referral Option:** Available at signup (linked to Agency or Creator).
- **Profile Approval:** Every change in profile (pictures, account details, bank details) must be **approved by Admin** before being visible.
 - Exception: ID card is verified once, not required again.
- **Price Setting:** Creators cannot set their own per-minute price. Only Admin can update via dashboard.

3.2 Profile

- Same fields visible as User app (About Me, Talks About, Hobbies, etc.).
- Cannot change referral after signup.

3.3 Features

- Support chat (linked with Admin).
 - Gift requests from users .
-

4. Admin Dashboard Requirements

4.1 Homepage Dashboard

- Stats Overview with filters (Today, Yesterday, Weekly):
 - Total Signups
 - Total Recharges (Number & Amount)
 - Install Sources (Google Play, Direct APK, etc.)
 - Net Calculations (Revenue – Deductions/Expenses)

4.2 User Management

- Section for all Users:
 - Support chat with users.
 - Option to block users (with reason/comment stored).

4.3 Creator Management

- Support chat with creators.
- Approve/Reject: Profile changes (pictures, account details, etc.).
- Price setting: Admin defines per-minute call charge.

4.4 Agency Management

- Approve/Reject agency KYC.
- Referral management (cannot be edited by agency/creator after signup).

4.5 Finance

- **Payment Reconciliation** with payment gateway.
- **Expenses Module:** Add & track expenses.
- **Withdrawals:** Manage payouts to creators.

4.6 Communication

- Broadcast messages to **Users / Creators / Agencies**.

5. Non-Functional Requirements

- Privacy: Show **warning before every call** (Creators not to share personal details).
 - Scalability: System should handle 100k+ users at peak load.
-

2.3 Agency App

Purpose: Agencies onboard and manage creators via referrals, track commissions, and request payouts.

Key Features:

- **Signup & KYC**
 - Fields: Real Name, Aadhar, PAN, DOB, Mobile, Profile Picture, Bank Details
 - KYC approval required by Admin (done once, cannot be resubmitted, only support contact for changes)
- **Referral**
 - Unique referral code/link generation with share option
 - Tracks number of creators added under agency
- **Commission**
 - Dashboard showing commissions earned from referred creators
- **Withdrawals**
 - Withdraw commission anytime (processed by Admin)
- **Support**
 - Chat with Admin only
- **Policy & Info**
 - Display of Terms of Use, Policies, etc.

Note:

Need agency and listener app in one application. So, we should have

1. User app
2. Listener & Agency app (both in 1).
